

Kamil Zigen

OPERATIONAL EXCELLENCE MANAGER | CONTINUOUS IMPROVEMENT | LEAN MANUFACTURING

Phone: +49 177 378 7153 | E-Mail: kamilzigen@gmail.com | LinkedIn: linkedin.com/in/kamil-zigen

Location: Leipzig, Deutschland | Availability: Immediate | Driving Licence: Class B

Work Authorization: German Opportunity Card (Chancenkarte) – Eligible to work and reside in Germany without visa processing delays

01 PROFILE

Operational Excellence and Continuous Improvement professional with 15 years of experience improving manufacturing performance across automotive, CNC machining, and serial production. Lean Six Sigma Black Belt with over €1.5 million in verified cost savings through TPM, Kaizen, KPI systems, and process optimization. Experienced in leading cross-functional improvement initiatives, quality systems, and operational excellence programs.

02 CORE COMPETENCIES

Production & Manufacturing: Production Planning, CNC Manufacturing, Shopfloor Management, Cycle Time Analysis, Production Control, Capacity Planning

Lean & Continuous Improvement: Lean Manufacturing, Continuous Improvement (CIP/KVP), Kaizen, TPM, 5S, Value Stream Mapping, Poka-Yoke, Kanban, OEE, SMED, Visual Management, Standard Work

Quality & Compliance: IATF 16949, APQP, FMEA, PPAP, SPC (Cp/Cpk), 8D Problem Solving, Non-Conformance Management

Project & Data Analysis: Six Sigma DMAIC, Root Cause Analysis (Ishikawa, Shainin Red X, A3, 5 Why), KPI Systems, Cost Reduction, Operational Excellence

Software & Systems: SAP PP, Siemens NX CAM, SolidWorks, Power BI, SQL

03 PROFESSIONAL EXPERIENCE

Professional Development & Relocation Preparation

06/2025 – Present

Language and Methodological Competence – Izmir, Turkey / Leipzig, Germany

- Intensive **German language training**; currently attending a **B1 course** with **B2 certification** planned.
- Lean Six Sigma Black Belt certified (2025)**; further development of **Power BI** and **SQL** skills for data-driven manufacturing systems.

Project Engineer | Chiron Group

11/2023 – 05/2025

CNC Machining Centers – Izmir, Turkey

- Managed **25 international CNC turnkey projects** throughout the full project lifecycle, including technical clarification, FAT, and customer acceptance, with a combined value exceeding **€2 million**.
- Analyzed customer drawings, 3D models, and production requirements to develop turnkey machining solutions including machine selection, fixture design, tooling concepts, and **NC programming**.
- Integrated robotic automation solutions and prepared complete project cost calculations.
- Reduced machining cycle times by **up to 30%**.
- Lowered annual tooling costs by approximately **€300,000** through the implementation of a **tool reconditioning program**.
- Coordinated activities with international customers, suppliers, and system integrators while working closely with the German headquarters in Tuttlingen.

Production & Process Engineer | Efatech

04/2023 – 11/2023

Textile Automation Systems – Izmir, Turkey

- Coordinated daily production activities and monitored manufacturing progress, schedules, and resource utilization.
- Created and maintained bills of materials, routing structures, and production master data while planning raw material requirements.

- Developed and optimized **CNC/CAM programs** for glass processing applications and supported new product introductions.
- Managed engineering changes and technical revisions for 12 machines; updated BOM structures for two new machines, preventing material ordering errors and production issues.
- Established production, outsourcing, and assembly workflows that enabled **100% on-time delivery performance** despite a complex manufacturing structure.

Plant Manager | *Trio Composites*

11/2021 – 03/2023

Composite Manufacturing for Wind Energy and Industrial Applications – Izmir, Turkey

- Held **full operational responsibility** for production, quality, maintenance, and occupational safety within a manufacturing SME employing 20 people.
- Established a new **CNC machining department** from the ground up, including equipment selection, workforce training, process design, and quality control systems.
- Implemented a site-wide **KPI dashboard** to monitor delivery performance, process efficiency, and manufacturing costs.
- Increased on-time delivery performance from **70% to 95%** within 12 months through production leveling, visual management, and daily KPI reviews.
- Reduced customer complaints by **40%** through structured root cause analysis and corrective action processes.

Process Leader / Manufacturing Engineer | *BorgWarner*

04/2013 – 10/2021

Automotive Serial Production – Izmir, Turkey

- Responsible for a Common Rail production line producing approximately **2.5 million components annually**, including technical leadership of 1 engineer, 3 process technicians, a 20-member maintenance team, and a manufacturing system comprising **50+ CNC machines with 100% traceability**.
- Delivered more than **12 Lean Manufacturing and Six Sigma projects**, generating measurable savings exceeding **€1.5 million** through scrap reduction, productivity improvement, and process stabilization.
- Led **APQP** activities for new product launches, including control plans, **FMEAs**, and **PPAP** documentation.
- Prepared and supported **IATF 16949 audits** and developed audit-related documentation including contingency plans, **8D reports**, first article inspection documentation, and deviation management processes.
- Applied real-time **SPC monitoring**, weekly process reviews, and structured problem-solving methods including **A3, 5 Why, Ishikawa, and Shainin Red X**.
- Increased **OEE by 8 percentage points** and reduced lead times by **35%** through **TPM implementation, Kaizen workshops**, and value stream analysis.

Production Engineer | *Totomak Machinery*

10/2010 – 04/2013

High-Volume CNC Manufacturing – Izmir, Turkey & Monterrey, Mexico

- Managed CNC manufacturing processes for automotive OEM production volumes reaching up to **2,500 parts per day**.
- Reduced scrap by **30%** through **SPC implementation** and tooling standardization, generating annual savings exceeding **€250,000**.
- Supported an international manufacturing transfer project and provided on-site operational support during production ramp-up activities in Mexico.

04 EDUCATION

M.Sc. Engineering Management (*Anabin: H+*)

2015 – 2018

Izmir Institute of Technology, Izmir, Turkey

B.Sc. Mechanical Engineering (*Anabin: H+*)

2003 – 2008

Dokuz Eylul University, Izmir, Turkey

05 CERTIFICATIONS

Lean Six Sigma Black Belt (2025) | Microsoft Power BI Data Analyst (2025) | Shainin Red X Apprentice (2015)

06 LANGUAGES

Turkish – Native | **English** – C1 (Professional Working Proficiency) | **German** – A2 (Currently attending intensive B1 training)
